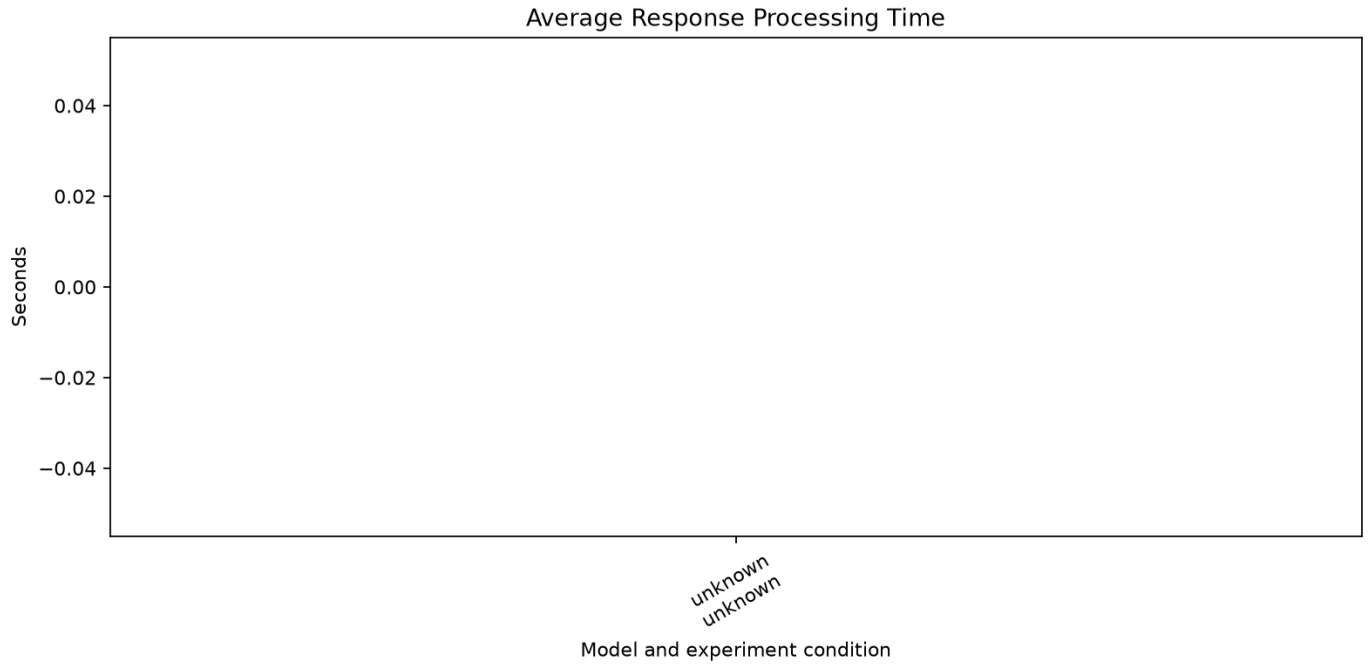
LLM Preprocessing Comparison Report

Experiment ID: 3a54045205e2
Response records analyzed: 10



Model	Condition	Samples	Average latency (s)	Average response characters
unknown	unknown	10	0.000	0.0

Interpretation: latency and response length are descriptive metrics. They do not independently establish factual accuracy, relevance, or overall response quality. Use a documented evaluation rubric or validated benchmark for these outcomes.
